Holm-adjusted Diebold-Mariano p of every model against the best model: white = separable at 5%, shaded "tie" = not separable, hatched = the reference
UCI, one-step (best: ExtraTrees)
UCI, recursive (best: SARIMA)
OPSD-H, one-step (best: Ridge)
OPSD-H, recursive (best: Holt-Winters)
OPSD-N, one-step (best: CSE (ours))
OPSD-N, recursive (best: XGBoost)
ETTh1, one-step (best: Ridge)
ETTh1, recursive (best: RandomForest)
ETTh2, one-step (best: ExtraTrees)
ETTh2, recursive (best: CSE (ours))
